Fiber Cleaning Box K-CB550 (Cassette Type)

550+ cleans on fresh microfiber tape for every wipe — and when the core is done, you swap the core, not the box.

One slot, every bench connector: the K-CB550 wipes SC, FC, ST and LC end faces on dry microfiber tape — no alcohol, nothing to spill, no residue. Each wipe runs on a fresh section of tape, 550+ cleans per core, and the core is replaceable, so the cost per clean stays the lowest on the bench.

K-CB550 — green housing (blue also available)

Key Features

- 550+ cleans per core on special dry microfiber tape — a fresh section of tape for every wipe, no alcohol, no residue
- One slot for SC, FC, ST and LC end faces; the body label also lists D4, MU, MT and DIN
- Both ferrule families: 2.5 mm and 1.25 mm, on UPC and APC polish
- Replaceable core: when the tape is spent, swap the core and keep the box — the cleaner is not a consumable
- Seated or sliding wipe: press the ferrule in place, or draw it across the window for a stubborn face
- Private labeling made to your requirements — your labels, part numbers and barcodes on the inner boxes and outer cartons, ready for your warehouse

The replacement core — swap the core, keep the box

One slot for FC, SC, ST and LC plugs

In Use

Seat the connector in the slot at 90 degrees and draw it across the exposed tape window; advance the lever so the next connector meets fresh tape. On a production line or a repair bench the box sits open beside the test set and works through trays of jumpers; on site it dresses a whole panel in one session. When the core is spent, open the case, swap in a replacement core and carry on — the box itself is not a consumable.

Private Label & OEM

The K-CB550 is supplied in neutral, unbranded stock as standard. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the inner boxes and outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.

In the Box

One K-CB550 fiber cleaning box with one cleaning core fitted (body colour as ordered: green or blue).
