K-KIT02 Fiber Optic Tool Kit

Complete 26-piece fiber optic tool kit in a reinforced hard case (430 × 330 × 135 mm) with fitted foam slots: J20 cleaver, CFS-2 stripper, KS-1 Kevlar shears, cable slitters, cleaning consumables and general hand tools. Contents customizable; private label available.

The K-KIT02 is a complete 26-piece tool kit for fiber optic cable installation and splicing preparation in the field. It covers the full working sequence on site — slitting and opening the cable, stripping the fiber, cleaving, cleaning, and the general hand tools an installer reaches for throughout the job — all in one kit, so a field team carries one case instead of loose tools. Every tool sits in its own foam slot inside a reinforced hard case (430 × 330 × 135 mm), protected during transport and easy to check at a glance: a missing tool is spotted before the team leaves the site. The kit is not a fixed box, though: contents can be adjusted to your work — tools added, removed or swapped — and the kit can be supplied with your own label.

K-KIT02 — standard configuration in the rugged hard case

Key Features

- Built around your job — the contents are not fixed: the tool selection is configured to your crew's work and your requirements, with your choice of case and your label on it if you want it
- 26 pieces covering the full working sequence — cable opening, stripping, cleaving, cleaning and the general hand tools an installer reaches for throughout the job
- J20 fiber cleaver, CFS-2 two-hole stripper and KS-1 Kevlar shears included, together with transverse and longitudinal cable slitters
- Reinforced hard case (430 × 330 × 135 mm) with fitted foam slots — every tool sits in its own slot, protected in transport and easy to check at a glance: a missing tool shows as an empty slot
- Cleaning and preparation covered: a lockable, leak-proof alcohol pump dispenser and lint-free fiber cleaning wipes
- Every tool in the set is also available on its own, so a lost or worn tool can be replaced without buying a whole new kit

Around the Case

Open case — tools in fitted foam slots

Case options — rugged hard cases and aluminum case

The standard case is the black rugged hard case with fitted foam slots. Yellow rugged cases and an aluminum case are also available — pick the case that suits the crew, and the contents are packed to the same list.

OEM & Private Label

The K-KIT02 can carry your brand. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the tools, the inner boxes and the outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.
