K-KIT05 Fiber Optic Tool Kit

Built around your work — the tool selection is configured to each customer's requirements, carried in an aluminum hard case. The 22-item standard configuration is listed below; contents can be adjusted to order.

The K-KIT05 is not a fixed box of tools. It is a kit built around the work it has to do: tell us what your crews install and maintain, and the contents are picked around that job — tools added, swapped or left out, in the case you want, with your label on it if you want it. The standard configuration below is the starting point: 22 items covering fiber preparation, cutting, cleaning and general installation, organized in an aluminum hard case. The lid carries an organizer panel with fitted pockets for the hand tools; the base has adjustable divider compartments, so instruments, packaged tools and consumables each travel in their own section.

K-KIT05 — standard configuration, fully loaded

Key Features

- Built around your job — the contents are not fixed: the tool selection is configured to your crew's work and your requirements, with your choice of case and your label on it if you want it
- Aluminum hard case with a lid organizer panel — the hand tools sit in fitted pockets in the lid, each in its own place and easy to check at a glance
- Adjustable divider compartments in the case base keep instruments, packaged tools and consumables in their own sections in transport
- The standard set covers the full preparation chain: fiber and wire strippers, cable strippers, cable cutter, Kevlar scissors, knife and hacksaw
- Cleaning and inspection are in the case too: 280 lint-free wipes, a pump alcohol dispenser, magnifying loupe, flashlight and tweezers
- Every tool in the set is also available on its own, so a lost or worn tool can be replaced without buying a whole new kit

Specifications

Case	Aluminum hard case with lid organizer panel and adjustable divider compartments
Set size	22-item standard configuration
Customization	Contents configured to order; private label available
Dimensions	450 x 330 x 145 mm (aluminum hard case)
Weight	—

10. Pliers — 1 pc	21. Box for small items — 1 pc
11. Side cutter — 1 pc	22. Aluminum hard case — 1 pc

Around the Case

Open case — lid tool panel, hacksaw and tool board

Divider compartments — wipes, strippers and consumables

Aluminum hard case — closed

One case, three ways of working: the lid panel keeps the everyday hand tools on show, the divided base takes instruments and consumables, and the closed case is a plain aluminum attaché that rides in the van without announcing itself.

OEM & Private Label

The K-KIT05 can carry your brand. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the tools, the inner boxes and the outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.
