K-KIT06 Fiber Optic Tool Kit

Built around your work — the tool selection is configured to each customer's requirements, carried in a black soft shoulder bag with blue trim. The standard configuration is listed below; contents can be adjusted to order.

The K-KIT06 is the shoulder-bag kit: a compact preparation and installation set that rides on the shoulder, so the crew member climbing, walking the route or working a cabinet has both hands free and the whole prep chain at their side. It is not a fixed box of tools: tell us what your crews install and maintain, and the contents are picked around that job — tools added, swapped or left out, with your label on the bag if you want it. The standard configuration below is the starting point: 11 pieces — the bag itself plus ten tools covering Kevlar and fiber stripping, cleaving, cable and sheath opening, and the everyday pliers, screwdriver and flashlight work around them.

K-KIT06 — standard configuration, bag and tools

Key Features

- Built around your job — the contents are not fixed: the tool selection is configured to your crew's work and your requirements, with your label on the bag if you want it
- Shoulder-bag carry for field work: the black soft bag with blue trim rides on the shoulder and keeps both hands free; flap top with two buckle straps, and two front pockets for the tools you reach for first
- The fiber preparation chain is in the bag: Kevlar shears, a three-hole fiber optic stripper and a fiber cleaver cover prep and cleaving for splicing and connector work
- Cable entry is covered too: a cable sheath separator plus rotary coaxial and round cable strippers open the cable types an FTTH crew meets on site
- The everyday hand tools ride along: needle-nose pliers, diagonal cutting pliers, a screwdriver and an LED flashlight for dark cabinets and closures
- Every tool in the set is also available on its own, so a lost or worn tool can be replaced without buying a whole new kit

4. Screwdriver — 1 pc	10. Fiber cleaver — 1 pc
5. LED flashlight — 1 pc	11. Round cable rotary stripper — 1 pc
6. Needle-nose pliers — 1 pc	

The Bag

Standard configuration, alternate view — the shoulder bag and its tools at an angle

The bag is a soft messenger-style shoulder bag in black fabric with blue piping: a flap top that closes with two buckle straps, two front pockets under the flap for the tools reached for most, and a shoulder strap for carrying between jobs. Bag colours and trim can be made to order for quantity orders, and the kit contents follow the bag — tell us the work and we will spec the set with you.

OEM & Private Label

The K-KIT06 can carry your brand. Private labeling is made to your requirements — labels with your logo, part numbers and barcodes on the tools, the inner boxes and the outer cartons, so the goods arrive ready for your warehouse. Custom barcode & contract labeling is applied to every inner box and outer carton to your receiving specification.
